

INVENTION DISCLOSURE FORM

1. Known or Likely Inventors

Inventor No. 1

Full Legal Name:

Residential Address:

Mailing Address:

Citizenship:

Work Phone:

Inventor No. 2

Full Legal Name:

Residential Address:

Mailing Address:

Citizenship:

Work Phone:

(List additional inventors on separate sheet when applicable).

2. Title of Invention

3. Product Designation

4. Conception of the Invention

Date of First Conception:

Date and Drawing Number of First Drawings or Sketches:

Date of First Written Description:

Date of First Oral Disclosure:

5. Construction and Testing of Invention

Date of First Assembly: Actual (_____), Expected (_____)

Built By:

Date of First Successful Test: Actual (_____), Expected (_____)

Tested By:

Has Prototype or Model of First Successful Test Been Retained?

If yes, who is custodian and where is it stored?

6. Publication

Has a description of the invention been published?

If yes, then enclose copy and list bibliographic information (authors, title, publication, date):

Author(s):

Title:

Publication:

Date:

(List information for additional publications on a separate sheet, when necessary).

If no, will a description of the invention be published during the next 12 months?

If yes, then list bibliographic information (authors, title, publication, date):

Author(s):

Title:

Publication:

Date:

(List information for additional publications on a separate sheet, when needed).

7. Government Funding

Was the invention made during the performance of a government contract or the result of research funded in whole or part by a government grant?

If yes, then list the contract number or grant number:

8. Sale

(a) Has a product incorporating the invention been offered for sale?

If yes, then:

(i) When?

(ii) Was the offered based on: (check all applicable)

_____ Proposal

_____ Complete but unconstructed design

_____ Untested prototype

_____ Experimental prototype for field testing with aid of customer

_____ Production model

If no, when is a product incorporating the invention likely to be offered for sale?

(b) When will production models be available for sale?

9. Description of the Invention

(a) What is the general field of the invention?

(b) List, and if available, provide copies of the closest known prior art, including products, printed publications, or patents:

(c) Attach copies of relevant background materials.

(d) List identifying information of your company's related patents, patent applications, printed publications and products:

(e) What problem does the invention solve?

(f) What are the advantages and improvements of the invention over the known prior art?

(g) Attach a written description of the invention, including functions performed, structure used and results achieved. Include sketches and/or samples for illustration.

10. Signatures

Inventor 1:

Date:

Inventor 2:

Date:

Witness:

Date:

(Attach additional sheet for inventor signatures when needed).
